

NBS Enterprises creates competitive advantages. We isolate and overcome constraints to deliver performance value for all involved – you, your customer, and your employees. We break current market trends with price-sensitive solutions.

NBS serves the U.S. Intelligence, National Security, Defense, Civilian, and Commercial Communities.

- **Mission Performance Solutions:** NBS delivers mission essential solutions in the areas of Information Assurance (IA), Enterprise Architecture, IT Transformation / Modernization, Program Management, Business Services, NOC Operations, Human Resources, Logistics, and others. Our services in these areas encompass planning and orchestration of Talent Coordination / Management Services Programs for Prime Contractor Teams, as well as Government Agencies. We perform customer-experienced Subject Matter Expert (SME) consulting and advisory engagements. Additionally, we provide talent acquisition, placement, and staff augmentation services using the NBS *Triangle* Methodology.
- **Talent / Human Capital Management (T/HCM):** NBS Subject Matter Expert (SME) consulting connects directly with new and re-compete business capture teams for both large and small businesses. NBS consultants engage their unique abilities to shape customer-specific proposals that deliver the right voice, the voice that speaks to the customer’s values, corporate culture, operational interests, and political pressures. NBS consultants deliver the key personnel and staff solution that fits the customer’s needs as well as their expectations. Our consultants aid capture teams within a long-term operational framework that results in a proposal that demonstrates employee engagement, development, and retention with reduced vacancy risk. The competitive environment experience that NBS consultants bring to each engagement allows them to draw actionable intelligence from their professional networks and proposed staff candidates. Their expertise also equips them to design and negotiate compensation packages that directly contribute to a ‘Low Price Technically Acceptable’ proposal.
- **Enterprise Resource Optimization (ERO):** NBS equips its clients to capture a sustainable operational advantage from their investments in ... *People, Processes, Information, and Technology* ... by breaking through organizational barriers, isolating opportunities for measureable efficiency gains, and capturing the value of those opportunities. For each client engagement, NBS brings the right combination of industry expertise and analytics together to achieve client-unique enterprise optimization. Our ERO consulting team employs a proven traditional consulting delivery model that provides skilled industry experts working in partnership with the clients. NBS uses their proprietary tools, techniques, and algorithms (Time, Lives, and Cost (TLC)) to craft solutions to complex, cost-driving challenges by leveraging our customer’s investments with our analytical techniques, lessons learned, and industry best practices. The net result is that our clients act with a fresh perspective as they realize new cost savings.
- **Professional Development:** Professional Development delivers a series of one-day seminars addressing topics of greatest importance to business and government leaders today. The critical topics include Talent Acquisition Techniques, Competitive Intelligence Capture, Candidate Selection Modeling, Staff Optimization, and Integrating HR into Business Capture. Each topic is available in both two and three-day workshop formats, as well as in client-specific content professional development programs.
